Hiring team, Emberline

Re: AI Engineer, Copilot Features

I build assistant features and then distrust them properly. Atlas Notes, my retrieval assistant, answers with citations or refuses; its prompt caching cut median answer latency 38 percent.

Signalcast, my eval harness, exists because demos lie. Offline evals plus A/Bs is exactly the loop I would want around completions and refactor flows.

I write TypeScript end to end and care about developer experience the way your product requires.

Sincerely,

Jane Doe
