Hiring team, Kestrel Freight

Re: Software Engineer, Marketplace

Money-adjacent correctness is my background: idempotent payments APIs in Go and PostgreSQL for 40k merchants, retry-safe webhooks, and a daily reconciliation job that caught what the retries missed.

A truck canceling at 2 a.m. reads like a payments failure with wheels. The runbook-with-the-feature habit transfers directly.

I would enjoy owning pricing paths where the p99 is public inside the team.

Sincerely,

Jane Doe
