Hiring team, Nimbus Forge

Re: ML Platform Engineer

Feature pipelines your models can trust is the line from your posting I keep thinking about. I built the BigQuery feature store behind Halespring's recommendation model with hourly freshness SLAs.

My eval harness, Signalcast, treats model quality like uptime: regression suites in CI, drift alerts, failure tags. That instinct belongs in a platform team.

Ray is new to me and I have said so on my resume; the rest of the stack is not.

Sincerely,

Jane Doe
